DETAILED ACTION

Drawings

1. The drawings are objected to because "channel 36" was not shown. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2833

3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 1 recites the limitation "said first portion", "said first strip", "said second strip" in lines 11-13. There is insufficient antecedent basis for this limitation in the claim.
5. Claim 3 recites the limitation "said insulating space" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim.
6. claim 6, is unclear. How can the interconnecting apparatus (first and second conductive bases) have a burn-in oven? This claim can not be examined for its merit.
7. Claim 8, lines 13-15 is unclear. The examiner interprets as "a connector comprised of an first and second strips, each of said strip carried a one half divided threaded stud positioned vertically thereon.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirokawa et al. (US 3,917,371).

Hirokawa et al. disclose an electrical apparatus for connecting a first and second power terminals (6a, 6b) comprising (see Figure 6):

Art Unit: 2833

- a first and second spaced apart conductive base (2a, 2b);
- a first and second respective vertical studs (25, 25) on the bases;
- a conductive coupler (17);
- an insulating insert (103, Figure 4).

Allowable Subject Matter

10. Claims 1-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. Claims 9-12 are allowed.

12. The following is an examiner's statement of reasons for allowance:

Regarding claim 3, the prior art of record fails to teach the insulating insert spacer comprise a U-shaped channel and a central fin vertically position centrally in the channel.

Regarding claim 4, the prior art of record fails to teach the studs is threaded.

Regarding claim 7, the prior art of record fails to teach a transversely split threaded stud position on the base and being secured together by an insulating medium.

Regarding claim 8, the prior art of record fails to teach a first and second spaced apart strips, each carried a one half divided threaded stud position vertical thereon. A threaded coupling nut connecting the divided threaded stud halves.

Regarding claims 9-12, the prior art of record fails to teach a method to form a conductive strip with an aperture at center, secure a vertical stud a the aperture to form an

Art Unit: 2833

assembly and forming a screw thread on the stud, cutting the assembly in half at the center of the strip to become two spaced apart conductive members.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
